TREE POWER

For the last 15 years, Riverside Public Utilities customers have used their March utility bill to claim free shade trees through RPU's Tree Power program.

RPU customers have planted more than 160,000 trees so far, beautifying the city, offsetting greenhouse gas emissions, and reducing energy use.

To learn more about Tree Power, go to **GreenRiverside.com/treepower**

160,000
Tree Power trees claimed

35,040,000
kWh saved by Tree Power trees over their lifetime

3,504
Homes could be powered by the energy saved by Tree Power trees

52,800,000
Pounds of carbon cleaned from the environment by Tree Power trees
